"It is with much gratitude that I am writing this letter to recommend Miss Rosalyn Piza as a Pranic Healer practitioner. My journey to wellness started on the 14th of August at 8 p.m. We started the session with what I later recognized as Rosalyn's personal approach. She asked questions, identified the issues at hand, let me know the protocol she would use, gave me instructions such sitting position, breathing patterns, visualizations, etc. Once the session was finished, she would ask how I was feeling mentally, physically, emotionally and would be very specific with her questions. She always took notes of the entire session, and emailed me a detail account of the session. Between our first and second session, Rosalyn had sent me valuable information including meditations in Youtube from Master Co, and also more follow up questions, and she continued sending me information after each session. We have had seven of such sessions, and I have to say that the sessions and Rosalyn's performance just became better and better. Rosalyn took it upon herself to get to know me more in depth as to know how to better be of service. Rosalyn then demonstrated such compassion and understanding honoring each one of my needs and healing processes. She always made sure to choose the right Pranic Healing protocol in each of our sessions, and made sure that she gathered enough useful information before and after each session. Rosalyn's commitment and intention is that of a natural healer. As our sessions continued, I started to get better. Emotionally, I started feeling more optimistic for life. Soon I began to experience positive changes as my relationship with my family started to get better. I began to see things with more clarity, and have many epiphanies about my scientific projects, my relationship with others, with myself and life in general. Evenmore, on the 2nd of September I had a rollerskate accident. My knee was badly injured. On the 4th of September I had a session with Rosalyn, and she focused on helping my knee. She chose a especial type of Pranic Healing protocol to help heal faster. To my surprise, by the end of the session, I was able to bend my leg at a 90 degree angle, thing that I was sure I was not going to be able to do at least for one more week. The fact that I

was able to bend my knee astound me! Only then I truly recognize that all the other positive “happenings” since I started my sessions with Rosalyn were not pure coincidence, but rather a direct outcome of our healing sessions. I also realized that Rosalyn’s pure intention and high integrity standards had to do with my overall healing. She made it so easy to be comfortable with her because she truly cares for others. Her energy is such of a healer that the only outcome is to get healed when one does a session with her. I think Rosalyn is a gem within the Pranic Healing community. I highly recommend Rosalyn as a healer, and I know the many people that will get her services will be as grateful as I am. ”
